

Filter No.	Filter Description	Replacement Freq.
1	CleanSwissP	Every 1 year or 10'000L
2	CarboSwiss	Every 1 year or 10'000L
3	CeraSwiss	Clean Once per year and replaced every 3 years or 50'000L

**Step 1**

Prepare a cloth or water bucket and place under the system to catch any water coming out from system during servicing.

**Step 2**

Turn off the water supply by turning the ball valve which is under the sink.

**Step 3**

Turn the filtration tap / valve to release the water pressure inside the system.

**Step 4**

Open the cover by pushing in the two hinges at both sides of the system.

**Step 5**

Slightly tilt the filter housing out and twist open by turning anti-clockwise.

**Step 6**

Change the filter (1) & (2), **take out Filter (3)** and put back all the filter housings for flushing.

**NOTE:** Make sure the filter housings contain at least half full of water before putting back. This is to prevent any air trapped inside the system which may cause leaking afterward.

<p><b>Step 7</b> Turn on the ball valve and allow the system to flush the new elements for <u>at least 20mins.</u></p>	<p><b>Step 8</b> Clean the Filter (3) with the blue brush by scrubbing the surface with the sand paper side.</p> 	<p><b>Step 9</b> Run the water on the surface of Filter (3) to wash away the residual after cleaning.</p>
<p><b>Step 10</b> Turn off the water supply after Step 7 is done and put back Filter (3) into the last housing.</p>	<p><b>Step 11</b> Close the filter housing tightly and allow the system to flush the Filter (3) for <u>another 20mins.</u></p> <p><b>NOTE:</b> <i>Make sure the filter housings contain at least half full of water before putting back. This is to prevent any trapped inside the system which may cause leaking afterward.</i></p>	<p><b>Step 12</b> Monitor all the connections to make sure no water leaking and close back the cover.</p>
<p><b>Step 13</b> Taste the waster after Step 11 is done, and make sure there is no after taste/smell in the water. Continue to flush the system for another 20 mins if there is any weird/smell in the water.</p>
